

LDM WOOD CONCEPTS, INC. RECLAIMED & RE-PURPOSED WOOD

LDM Wood Concepts has a long tradition of reusing and repurposing wood that was destined for a landfill. From pallets, crates, trailer flooring, boxcar flooring, or other salvaged wood, we specialize in building our furniture pieces with this type of material. This is better than FSC or other environmental lumber programs because no new trees are cut down.

We build our reclaimed pieces in one of two ways. First is to leave the reclaimed or distressed look. Nail holes, splits, checks, etc. are left in to add character to the piece. The second is to remove the reclaimed flaws and build a piece that no one could tell came from reclaimed lumber.

Feel free to inquire about the reclaimed & re-purposed process for your next project.

MAPLE CHAIR AND OAK END TABLE
MADE USING RECLAIMED &
RE-PURPOSED WOOD
